Dr Tracey Bjorkman, current funding recipient

*"The Lions Medical Research Foundation is committed to raising funds for medical research to improve the quality of life for present and future generations".*

*The Lions Medical Research Foundation is a non profit organization funding medical researchers. The Foundation is dedicated to raising money to continue its 48 year history in providing seed funding to early career medical researchers. We continuously seek ways to raise funds by exploring different avenues of revenue; clearly articulating the outcomes of medical research and the positive effects of this research. The Foundation is supported by the Lions community and the greater community in general.*

*Since it began in 1963, the Lions Medical Research Foundation has supported internationally recognized medical research in a diversity of areas. The Foundation does this by funding early career medical researchers. This nurturing, results in future medical successes giving health benefits to all. Some examples of research: Parkinson's Disease, Kidney disease, Asthma, Urodynamics, Anti-venom, Immunology, Ophthalmology, Toxicology, Perinatal, Schizophrenia, Diabetes, Skin Cancer, Cord Blood, In-vitro Corneal Transplant, Cancer therapies, Bone & Joint Disease and many others.*
